What is Umami?

There are five basic elements to our sense of taste.

Scientists debated whether umami is a sixth element to the sense of taste since its discovery by Kikunae Ikeda in 1908. Then in 1985, at the first Umami International Symposium in Hawaii, umami was accepted as a term to describe the flavors of glutamates and nucleotides. Umami is caused by the taste of amino acid L-glutamate and 5'-ribonucleotides such as guanosine and inosinate.

High Quality Fermented Seasonings
